and document
management features.**

PROACTIVELY PROTECTS DATA BY PROTECTING THE DATA ITSELF

GRANULAR CONTROL OF DATA ON-CLOUD OR OFF. SECURITY STAYS WITH DATA

ONE-CLICK RANSOMWARE RECOVERY: MITIGATES THE ATTACK (DATA CORRUPTION) AND THE ATTACKER (EXPLOITATION & RANSOM)

Immediate

- Swift, no integration, low friction deployment on-cloud off-cloud servers
- Turnkey autonomous business as usual UX
- Encrypts/parses/scatters: multiple copies to multiple locales for data resilience
- Agnostic: Amplifies or replaces legacy systems & tools
- Company controls, no access by STASH or anyone else
- Automatic persistent protection to sensitive data inside & outside of the Organization

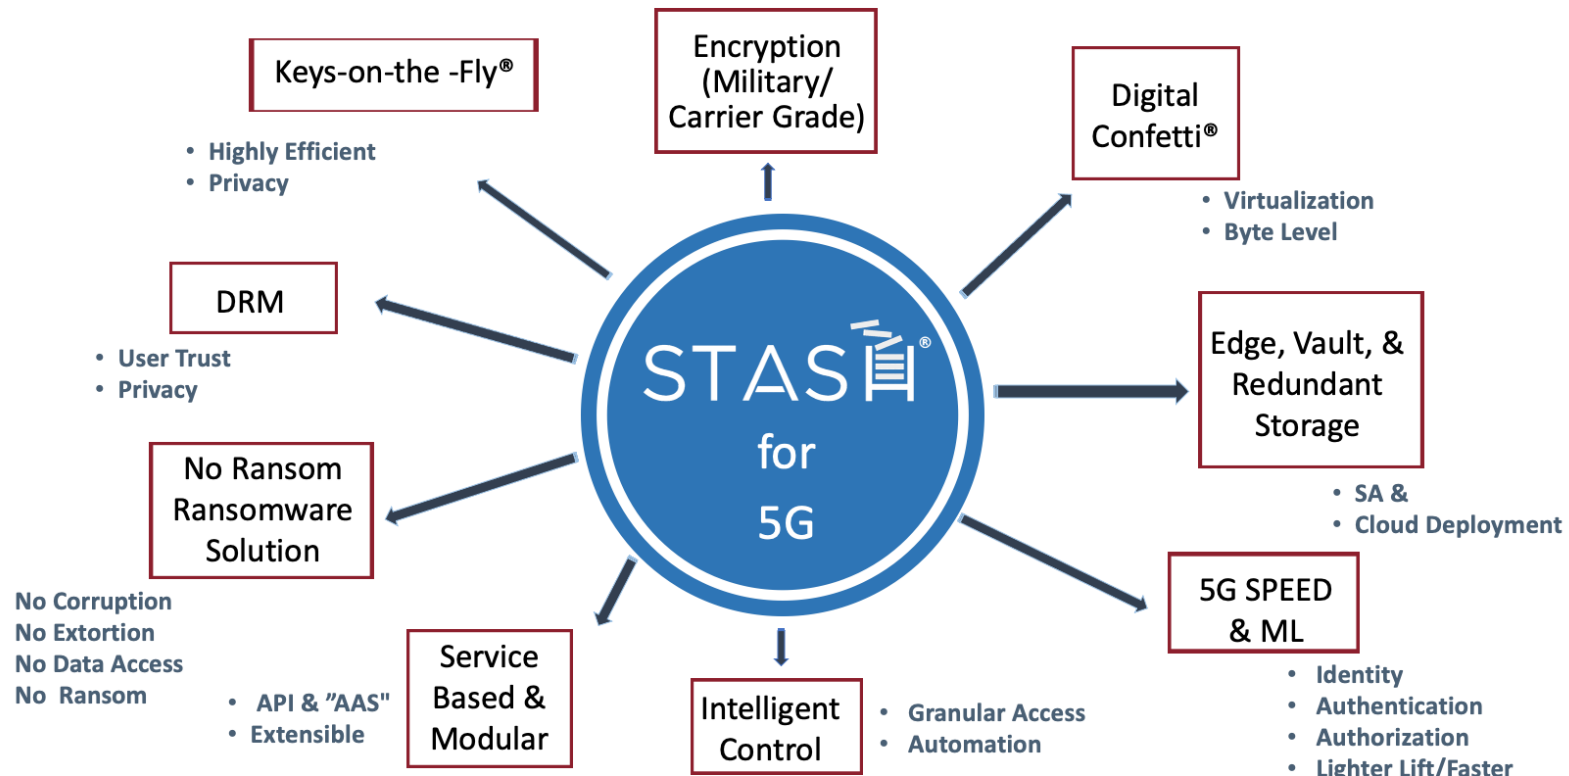

On-going

- Minimize low-value tactics, re-invest resources in proactive security solution
- 1-Click No Ransom Ransomware Protection & Recovery Solution Restore data in real-time by date, time, versions. Pay no ransom
- Eliminate time-to-detection, time-to-remediation security risks & costs
- Reduces \$ loss expectancy from data compromise to statistically improbable odds
- Privacy & security stays with the data wherever it is or goes
- Granular control of data inside & outside of organizations
- Create secure/private workflows for seamless sharing of protected data
- Minimize data security TCO by 10-80% (with dependencies)
- SAAS or custom application via API for providers and administrators

Always

Data Breach No Longer Means Data Compromise
